

```
# place in
#create dir if needed
#/etc/polkit-1/localauthority/50-local.d/automount.pkla
```

```
[Allow Automount]
Identity=unix-group:plugdev
Action=org.freedesktop.udisks2.filesystem-mount*
ResultAny=yes
ResultInactive=yes
ResultActive=yes
```

```
[Allow Eject]
Identity=unix-group:plugdev
Action=org.freedesktop.udisks2.eject-media*
ResultAny=yes
ResultInactive=yes
ResultActive=yes
```

```
[Allow Mounting of fstab]
Identity=unix-group:plugdev
Action=org.freedesktop.udisks2.filesystem-fstab*
ResultAny=yes
ResultInactive=yes
ResultActive=yes
```

```
# ----- OTRA FORMA ----- #
```

```
sudo nano /usr/share/polkit-1/actions/org.freedesktop.UDisks2.policy
```

Aquí encontramos la regla comenzando con lo siguiente:

```
<action id="org.freedesktop.udisks2.filesystem-mount">
```

Y en la parte inferior de este bloque, modifique las siguientes secciones sobre esto:

```
<defaults>
  <allow_any>auth_admin</allow_any>
  <allow_inactive>auth_admin</allow_inactive>
  <allow_active>yes</allow_active>
</defaults>
```

a:

```
<defaults>
  <allow_any>yes</allow_any>
  <allow_inactive>yes</allow_inactive>
  <allow_active>yes</allow_active>
</defaults>
```
